The online book is now a stand-alone website

westernforbs.org

Westernforbs.org is designed to aid seed collectors, seed growers, nurserymen, landowners, restoration practitioners, and land managers as they increase the supply and use of native forbs.

- **Species** – Offers complete reviews that synthesize existing research and practical experience available for western forb species. Anything reported on the biology, ecology, seed technology, and use in wildland restoration is included.
- **Lookup Table** – Summarizes forb species data in a searchable and filterable table. Included are the data on taxonomy, distribution, biology, ecology, seed supply development, and nursery and wildland restoration knowledge for each species.
